

Southern Soils FERTILISER

A BALANCED APPROACH

A natural phosphorus fertilizer made from highly reactive, high grade reactive phosphate rock (RPR) combined with BioAg's microbial digesting agent

A fertilizer that delivers long lasting, sustained release nutrient making both annual and biennial (every second year) applications possible

A natural and sustainable alternative to conventional fertilisers

BioAgPhos

PASTURE FERTILISER

TYPICAL ANALYSIS

Phosphorous 12.7%

Calcium 35.0%

Sulphur 1%

Belt spreader application only

Soil Stimulants ✓

Active Biology ✓

Organic Certified

AOR 221

RECOMMENDATION

100 - 500kg/Ha Autumn Application

Consult with your agronomist for best application rates

bioAGPHOS

Biologically Digested Reactive Rock Phosphate

Phosphate digester inoculated	✓
High citrate solubility - plant available phosphorous	✓
Readily available calcium	✓
Sulphur included naturally	✓
Plant and soil stimulants	✓
Custom blend base fertiliser	✓
Soil building biology	✓
Organic certifiable	✓
Applications from as little as 100kg/Ha	✓
Cost effective and paddock proven	✓

customBLEND

Use **bioAGPHOS** as a base for a custom blend made specially for your farm from a soil analysis interpretation. We blend the specific nutrients needed to correct deficiencies and maximise growth for easy one pass application.

BLEND WITH;

- Potash
- Lime
- Gypsum
- Zinc
- Copper
- Molybdenum
- Boron
- Selenium
- Cobalt
- Manganese
