

# Southern Soils FERTILISER

*A BALANCED APPROACH*

BokashiFERT\* a cost effective natural fertiliser containing high levels of NPK, calcium and trace elements in a carbon rich and neutral pH form.

The base ingredient is chicken manure, which is combined with carbon ingredients and processed to a high standard with the aid of microbes and mechanical turning.

The process used to make BokashiFERT\* encapsulate and stabilise N.P.K., making it readily available for plant uptake.

# BokashiFERT

**MORE THAN A QUALITY COMPOST**

#### TYPICAL ANALYSIS

<b>Nitrogen</b>	3.8 - 4.2%
<b>Phosphorous</b>	1.8 - 2.2%
<b>Potassium</b>	1.8 - 2.2%
<b>Carbon</b>	25 - 27%
<b>Calcium</b>	8 - 10%
<b>Sulphur</b>	1%

#### RECOMMENDATION

Consult with your agronomist for best application rates

Can be used as a complete fertiliser or as a base for a custom blend
