

Southern Soils FERTILISER

A BALANCED APPROACH

bioBLEND is a unique product containing calcium, phosphate, boron, sulphur and biological stimulants.

Designed to supply maintenance levels of phosphorous and sulphur while increasing soil calcium and pH.

bioBLEND contains multiple forms of calcium, phosphorous and sulphur providing essential levels of nutrients in immediately available and sustained release forms.

bioBLEND

Calcium Phosphate Sulphur Boron

TYPICAL ANALYSIS

Phosphorous	2.3%	Soil Stimulant	✓
Calcium	28%	Active Biology	✓
Sulphur	3.3%		
Boron	0.1%		

RECOMMENDATION

HIGH RAINFALL ZONE
500 - 800kg/Ha Autumn Application

LOW RAINFALL ZONE
300 - 500kg/Ha Autumn Application

USE AS A BASE FOR A CUSTOM BLEND
Belt spreader application only

bioBLEND

**CALCIUM
BORON
SULPHUR
PHOSPHOROUS**

Improves acidic soils

Added boron for improved calcium usage

Two forms of phosphorous water soluble and slow release

Two forms of sulphur

Biologically inoculated

Plant and soil stimulants

Environmentally beneficial and soil building

Applications from as little as 300kg/Ha

Custom blend base fertiliser

Cost effective and paddock proven

bioBLEND
on farm BLENDING

SOUTHERN SOILS can mix **bioBLEND** on Farm
Where quantities permit, Southern Soils can Deliver **BioBLEND** ingredients in bulk and professionally blend them on farm before spreading to save you time and money.
