

# cropSTART

## BioEnhanced Liquid Seeding Fertiliser

cropSTART is a new generation of carbon rich biologically enhanced liquid fertilisers.

Typical Analysis (w/v)		Microbial System
Nitrogen	13.6%	Typical Contents
Phosphorous	7.7%	<i>Trichoderms Viride</i>
Potassium	0.98%	<i>Bacillus subtilis</i>
Humates	2.1%	<i>Bacillus oagulans</i>
Sulphur	1.43%	<i>Bacillus pumilie</i>
Calcium	9.78%	<i>Bacillus lichenformis</i>
Copper	0.18%	<i>Bacillus megaterium</i>
Manganese	0.18%	<i>Bacillus azotoformane</i>
Boron	0.17%	Essential amino acids
Silica	0.24%	Natural sugars
Molybdenum	0.01%	Folic Acid
Zinc	0.21%	Humic, Fulvic
Omegas	0.56%	Kelp, Fish
Sugars	0.84%	Vitamins

cropSTART is a carbon rich guano based liquid injection fertiliser formulated for direct in furrow soil application at seeding.

Containing a complete balanced compliment of beneficial microbiology, specific nitrogen and phosphate fixing biology, brewed and bio-chelated NPK and traces, plant stimulants, active enzyme promotents, humic and fulvic acid.

### Typical Application

10-20 ltrs cropStart per Ha—Cereal crops (1:1 water)

“cropStart is the most cost effective Biologically Enhanced liquid seeding fertiliser on the market...that gets results in the header”
