

Southern Soils FERTILISER

A BALANCED APPROACH

superSEVEN is made of a blend of multiple forms of phosphorous, calcium and sulphur providing essential levels of nutrients in immediately available and sustained release forms.

Inoculated with phosphate solubilising biology and soil stimulants **superSEVEN** builds healthy soil and provides a biological boost for ongoing pasture production

superSEVEN

BIOLOGICALLY ACTIVATED PHOSPHATE FERTILISER

TYPICAL ANALYSIS

Phosphorous	7%
Calcium	21%
Sulphur	10%
Soil Stimulants	✓
Active Biology	✓

RECOMMENDATION

HIGH RAINFALL ZONE
200 - 300kg/Ha Autumn Application

LOW RAINFALL ZONE
100 - 200kg/Ha Autumn Application

USE AS A BASE FOR A CUSTOM BLEND
Belt spreader application only

superSEVEN

**Phosphate
Fertiliser
That Ticks
All The
Boxes**

Phosphate digester inoculated	✓
Two forms of phosphate water soluble and slow release	✓
Two forms of calcium and sulphur	✓
Readily available calcium	✓
Plant and soil stimulants	✓
Custom blend base fertiliser	✓
Soil building biology	✓
Environmentally beneficial	✓
Applications from as little as 100kg/Ha	✓
Cost effective and paddock proven	✓

SUPERSEVEN custom BLEND

Use superSEVEN as a base for a custom blend made specially for your farm from a soil analysis interpretation. We blend the specific nutrients needed to correct deficiencies and maximise growth for easy one pass application.

BLEND WITH;

- Potash
- Lime
- Gypsum
- Zinc
- Copper
- Molybdenum
- Boron
- Selenium
- Cobalt
- Manganese
